Following the formal rules of dodecaphony, for “Zwölftonform” twelve consecutive titles are composed exclusively with twelve consecutive frequencies.

Aligned to the serial character of the composition concept, the titles were first published during the four quarters of 2015 as a digital EP, and at the beginning of 2016 as a full physical release.

Zwölftonform

Andreas Lutz

Following the formal rules of dodecaphony, for "Zwölftonform" twelve consecutive titles are composed exclusively with twelve consecutive frequencies. The basic structure for each title is made by up to twelve different sound samples from a generated sine waveform. Built on this basis, these arrangements reference and illustrate especially over time the complexity and increasing compression of the original shape.

For the visual translation and presentation as a live performance and audio-visual installation, the sinusoidal waveform is abstracted along the album convention. Following parameterized principles, twelve visual embodiments of this basic shape arise. The increasing complexity is now visible and the prevailing simplicity at the beginning inverted by the end. This evolving aesthetic is punctuated with a grid, that divides the base with the value of the sample number.

Artist

Andreas Lutz analyzes and reveals phenomena of perception versus reality and principles of abstract aesthetics with audio-visual installations.

The creation of experimental soundscapes and the relation of semiotics and sound are further aspects of his work.
